

The news is light this week. How many people heard the geese go over on Saturday morning around 8:55? I Cannot believe they were flying north. Seems too early for winter to be over. Especially after all of the cold the east coast has had. Who knows what Mother Nature has in store for us?

Elton Stewart called me on Monday and wanted to let everyone know that Jan. 16 is his 84th birthday. Happy Birthday Elton! Happy birthday to our awesome post mistress, Beverly Haygood. She always greets you with a smile, so today take the time to wish her a very special day. Love you, Beverly. Well, I do not know what birthday it is for Beverly, but you know a lady never tells.

Tom wanted everyone to know that is time to plant turnips. He planted his last week before all of the rain. We had 1.25-inches of rain. Thank you, Lord. Garden planting time is just around the corner. Potatoes and onion are always planted around Valentine's Day at the Young house.

P31 has exploded in 2014. We had 20 in all on Monday night. We are off to a good start to working toward our goals of overall good health. Also, congratulations to Comfort Texas for starting a P31 there.

Remember to call me at 903-612-8806; email me at youngdede60@gmail.com ; or stop by and visit. I love to meet new people, greet old acquaintances, and talk. I know a lot of you do not believe this. Hope to have an update on all that is going on around Brashear.
